

Patent #: **JP 61239084**

Issue Date: 10/24/86

Assignee: Saiden Chemical Industry Co., Ltd.

Title: "Method for the Production of Articles With Gas-Permeable Coatings"

Type: Process

Summary of Claims:

- Process for producing articles with gas permeable coatings
- Kerosene or mineral turpentine is added to aqueous emulsion.
- Emulsion polymer is acrylic, ethylene-vinyl acetate, urethane or butadiene-based.
- Emulsification is next step.
- Articles are impregnated or coated.

Summary of Teachings:

- The object of the invention is to provide excellent gas & moisture permeability and to reduce air pollution.
- End uses are water proofing, clothing, artificial leather and diaper covers.
